

3.1.1 Worksheet

Problems

Use the Giant One to find the specified equivalent fraction. Your answer should include the Giant One you use and the equivalent numerator.

1. $\frac{4}{3} \cdot \boxed{} = \frac{?}{15}$

2. $\frac{5}{9} \cdot \boxed{} = \frac{?}{36}$

3. $\frac{9}{2} \cdot \boxed{} = \frac{?}{38}$

4. $\frac{3}{7} \cdot \boxed{} = \frac{?}{28}$

5. $\frac{5}{3} \cdot \boxed{} = \frac{?}{18}$

6. $\frac{6}{5} \cdot \boxed{} = \frac{?}{15}$

7. When finding equivalent fractions why do we use a Giant One?
