

Add/Subtract Integers Worksheet #2

Directions: Do the following in your math notebook

① Froggy made the following jumps:

- A jump to the right 3 units
- A jump to the left 4 units
- A jump to the right 6 units

Draw three number lines show three different ways Froggy could have made his jumps.

② Using the information from question #1 write three different addition problems (numerical expressions) showing Froggy's jumps.

③ Solve the three addition problems you created in question #2. Visually prove your answer is correct by using counters (use the counters for each problem you solve)
