

Corresponding Side or angle:

A side or angle in the same position
in a different place (see below for example)

In order for two figures to be **similar**, there must be the following correspondence between the figures. (The follow must be in place)

- The side lengths of one figure are multiplied by the same number to get the corresponding side lengths in the second figure.
- The corresponding angles are the same size.

Red = Corresponding Sides

Blue = Corresponding Angles
